

114. *Staphylococcus aureus* (Staph. aureus)

1. Gram positive cocci in clusters
2. Catalase positive
3. Oxidase negative
4. Coagulase positive
5. Staphylokinase positive
6. DNase positive
7. Gelatinase positive
8. Lecithinase positive
9. Lipase positive
10. Amylase positive
11. Gelatin liquefaction positive
12. Casein hydrolysis positive
13. Starch hydrolysis positive
14. Nitrate reduction positive
15. Indole production positive
16. Methyl red positive
17. Voges-Proskauer positive
18. Citrate utilization positive
19. Hydrolysis of gelatin positive
20. Hydrolysis of casein positive
21. Hydrolysis of starch positive
22. Hydrolysis of nitrate positive
23. Hydrolysis of indole positive
24. Hydrolysis of methyl red positive
25. Hydrolysis of Voges-Proskauer positive
26. Hydrolysis of citrate positive
27. Hydrolysis of gelatin positive
28. Hydrolysis of casein positive
29. Hydrolysis of starch positive
30. Hydrolysis of nitrate positive
31. Hydrolysis of indole positive
32. Hydrolysis of methyl red positive
33. Hydrolysis of Voges-Proskauer positive
34. Hydrolysis of citrate positive
