

Finished product	Qualifying process to be performed within the Area
ex 39.02 Other polymerisation and copolymerisation products, in the forms mentioned in Notes 3 (a) and 3 (b) to Chapter 39	<p>1) Manufacture from a monomer which has been made in the Area by chemical transformation</p> <p>1) Manufacture from materials not falling in Chapter 39 and not being solutions of artificial resins (ex 32.09), provided that all of any monomer which contributes 50 per cent or more by weight of the dry polymers and copolymers contained in the finished product has been made in the Area by chemical transformation. If no one monomer contributes 50 per cent or more by weight of the dry polymers and copolymers contained in the finished product, each of any two or more monomers which together contribute 50 per cent or more by weight of the dry polymers and copolymers contained in the finished product must have been made in the Area by chemical transformation</p>
ex 39.02 Polymerisation and copolymerisation products, in the forms mentioned in Notes 3 (c) and 3 (d) to Chapter 39	<p>Manufacture from materials falling in 39.02 which are in any form mentioned in Notes 3 (a) and 3 (b) to Chapter 39 or from materials not falling in Chapter 39, provided that both</p> <p>(a) the process does not consist solely of agglomerating without change in the degree of polymerisation, or slicing, or sintering, or shaping by cutting tools, or any combination of these processes and</p> <p>(b) 50 per cent or more of the combined weight of the artificial resins and plasticisers used is of Area origin</p> <p style="text-align: center;"><i>or</i></p> <p>1) Manufacture from monomers, provided that either</p> <p>(a) all of any monomer which contributes 50 per cent or more by weight of the dry polymers and copolymers contained in the finished product has been made in the Area by chemical transformation. If no one monomer contributes 50 per cent or more by weight of the dry polymers and copolymers contained in the finished product, each of any two or more monomers which together contribute</p>

1) "Chemical transformation" has the meaning given in the Introductory Notes to Chapter 29 except that curing (hardening) shall not be considered to be a chemical transformation.
