

Finished product	Qualifying process to be performed within the Area
<i>Chapter 84. Boilers, machinery and mechanical appliances; parts thereof.</i>	
The qualifying processes for this Chapter will remain in force for a period ending on 31st December, 1961. The qualifying processes to be applied thereafter will be negotiated before that date.	
84.01 Steam and other vapour generating boilers (excluding central heating hot water boilers capable also of producing low pressure steam)	Manufacture from materials not falling in 84.01 or 84.02
84.02 Auxiliary plant for use with steam and other vapour generating boilers (for example, economisers, superheaters, soot removers, gas recoverers and the like); condensers for vapour engines and power units	Manufacture from materials not falling in 84.02
84.03 Producer gas and water gas generators, with or without purifiers; acetylene gas generators (water process) and similar gas generators, with or without purifiers	Manufacture from materials not falling in 84.03
84.04 Steam engines (including mobile engines, but not steam tractors falling within heading No. 87.01 or mechanically propelled road rollers) with self-contained boilers	Manufacture from materials not falling in 84.01, 84.02, 84.04 or 84.05
84.05 Steam and other vapour power units, not incorporating boilers	Manufacture from materials not falling in 84.02 or 84.05
84.06 Internal combustion piston engines	Manufacture from materials not falling in 84.06, and not being gears and gearing (including friction gears), gear-boxes and other variable speed gears or clutches (ex 84.63, 85.02 or 87.06)
84.07 Water wheels, water turbines and other water engines, including regulators therefor	Manufacture from materials not falling in 84.07
84.08 Other engines and motors	Manufacture from materials not falling in 84.08
