

## Bilag 2.

## Liste I B.

## (Gifte)

- aldrin (endo,exo-1,2,3,4,10,10-hexachlor-1,4,4a,5,8,8a-hexahydro-1,4,5,8-dimethanonaphthalen)
- antu ( $\alpha$ -naphthylthiourinstof)
- azobenzen
- blyarsenat
- brom
- $\beta$ -butoxy- $\beta'$ -thiocyano-diethylether
- calciumarsenat
- calciumphosphid
- chlordan (2,3,4,5,6,7,10,10-octachlor-4,7,8,9-tetrahydro-4,7-endomethanoindan)
- chlorerede camphener (bruttoformel  $C_{10}H_{10}Cl_8$ )
- 3-chlorpropen (allylklorid)
- coumachlor (3-[( $\beta$ -acetyl- $\alpha$ -p-chlorphenyl)-ethyl]-4-hydroxy-coumarin)
- coumafuryl 3-[( $\beta$ -acetyl- $\alpha$ -furfuryl)-ethyl]-4-hydroxycoumarin
- cycloheximid ( $\beta$ -[2-(3,5-dimethyl-2-oxocyclohexyl)-2-hydroxyethyl]-glutarimid)
- diazinon (O,O-diethyl-O-[2-isopropyl-4-methylpyrimidyl-(6)]-thiophosphat)
- dichlorvos (O,O-dimethyl-2,2-dichlorvinylphosphat)
- dieldrin (endo,exo-1,2,3,4,10,10-hexachlor-6,7-epoxy-1,4,4a,5,6,7,8,8a-octahydro-1,4,5,8-dimethanonaphthalen)
- diethylsulfat
- dimethoat (O,O-dimethyl-S-(N-methylcarbamoylmethyl)-dithiophosphat)
- endothal (dinatrium-3,6-endoxo-hexahydrophthalat)
- ethoxymercurisilicat
- ethylmercuribromid
- ethylmercurichlorid
- ethylmercurithiouroniumchlorid
- flussyre (hydrogenfluorid) og dens normale og sure alkali- og ammoniumsalte
- heptachlor (1,4,5,6,7,10,10-heptachlor-4,7,8,9-tetrahydro-4,7-endomethanoinden)
- lindan (gamma-1,2,3,4,5,6-hexachlorcyclohexan)
- malathion (O,O-dimethyl-S-(1,2-dicarbethoxyethyl)-dithiophosphat)
- mercurioxid, kviksølv (II)-oxid
- mercurochlorid, kviksølv (I)-chlorid (kalmel)
- methoxyethylmercurichlorid
- methoxyethylmercurisilicat
- methoxymethylmercuriacetat
- methylchlorthion (O,O-dimethyl-O-(3-chlor-4-nitrophenyl)-thiophosphat)
- methylmercuridicyandiamid
- methylmercurihydroxid
- monobromeddikesyre samt salte og estere heraf
- monochloreddikesyre og dens salte
- natrium-methyldithiocarbamat
- nicotin i puddere med højst 1 pct. nicotin eller 10 pct. tobaksstøv
- phencapton (O,O-diethyl-S-(2,5-dichlorphenylmercaptomethyl)-dithiophosphat)
- phenylmercuriacetat
- phenylmercurichlorid
- phenylmercurihydroxid
- phenylmercurihydroxyquinolin
- phenylmercurinaphthenat
- phenylmercuriprocatechin
- 1-phenyl-3-methyl-pyrazolyl-(5)-dimethylcarbammat
- pindon (2-pivaloyl-1,3-indandion)
- 2-propen-1-ol (allylalkohol)
- ronnel (O,O-dimethyl-O-(2,4,5-trichlorphenyl)-thiophosphat)
- stroban (en blanding af heptachlorcamphen, heptachlorpinen og andre chlorerede terpener, indeholdende 66 pct. chlor (bruttoformel  $C_{10}H_{11}Cl_7$ ))
- tellurforbindelser, uorganiske
- trichlorfon (O,O-dimethyl-2,2,2-trichlor-1-hydroxyethylphosphonat)
- warfarin (3-[( $\beta$ -acetyl- $\alpha$ -phenyl)-ethyl]-4-hydroxycoumarin)
- zinkarsenat
- zinkphosphid

De stoffer, som apotekerne ifølge farmakopeen skal opbevare adskilt fra andre stoffer (separanda), og som kun må udleveres efter recept; herfra er dog undtaget de af lovgivningen om euforiserende stoffer omfattede stoffer, for tiden lov nr. 169 af 24. maj 1955.
