

COUNTRY: UZBEKISTAN

Sector
All energy sectors.

Level of government
National.

Description
The law on Restricting Monopoly Activities has been adopted in Uzbekistan and has been in force since July 1992. However, the law (as is specified in article 1, paragraph 3) does not extend to the activities of the enterprises in the energy sector.

Phase-out
1 July 2001.

ARTICLE 7(4)

»In the event that Transit of Energy Materials and Products cannot be achieved on commercial terms by means of Energy Transport Facilities the Contracting Parties shall not place obstacles in the way of new capacity being established, except as may be otherwise provided in applicable legislation which is consistent with paragraph (1).«

COUNTRY: AZERBAIJAN

Sector
All energy sectors.

Level of government
National.

Description
It is necessary to adopt a set of laws on energy, including licensing procedures regulating transit. During a transition period it is envisaged to build and modernize power transmission lines, as well as generating capacities with the aim of bringing their technical level to the world requirements and adjusting to conditions of a market economy.

Phase-out
31 December 1999.

COUNTRY: BELARUS

Sector
All energy sectors.

Level of government
National.

LAND: USBEKISTAN

Sektor
Samtlige energisektorer.

Regering
National.

Beskrivelse
En lov om monopolbegrænsning har været i kraft siden juli 1992. Loven omfatter imidlertid ikke virksomhederne i energisektoren (artikel 1, stk. 3).

Afvikling
1. juli 2001.

ARTIKEL 7, STK. 4

»Kan transit af energimaterialer og -produkter ikke finde sted på kommercielle betingelser gennem de eksisterende energitransportinfrastrukturer, må de kontraherende parter ikke stille hindringer i vejen for, at der skabes nu energitransportkapacitet, medmindre andet er fastsat i gældende lovgivning, som er i overensstemmelse med stk. 1.«

LAND: ASERBAJDSJAN

Sektor
Samtlige energisektorer.

Regering
National.

Beskrivelse
Der bør vedtages en række love om energi, herunder godkendelsesprocedurer til regulering af transit. Der er i en overgangsperiode planer om at opføre og modernisere eltransmissionsledninger og elproduktionsanlæg for at højne det tekniske niveau på linje med de internationale krav og tilpasse vilkårene til markedsøkonomien.

Afvikling
1. januar 1999.

LAND: HVIDERUSLAND

Sektor
Samtlige energisektorer.

Regering
National.
